VPR-X
Vapour Suppressant - Remediation Solution

GENERAL DESCRIPTION:

VPR-X is a specialized formula used to reduce LEL’s and dangerous gases in tanks, trucks or any hydrocarbon storage vessel. VPR-X will encapsulate dangerous gases and suppress VOC’s thus reducing exposure.

VPR-X is an excellent hydrocarbon emulsifier and can be used effectively as a catalyst for environmental cleanups. In the case of soil remediation, a 2-5% solution is used to encapsulate the hydrocarbons for removal. This accelerates the bioremediation process.

VPR-X offers low environmental impact and can be used on various applications where LEL / VOC reduction, degreasing, or pressure washing performance is required.

BENEFITS:

Reduce LEL’s / VOC’s; H2S/ SO2 gas on contact
Biodegradable surfactant
Environmental Remediation
Excellent wetting agent for cleaning metal surfaces
Excellent degreaser
No negative effects downstream
Wax and paraffin removal

PRODUCT SPECIFICATIONS:

Appearance...............................Clear pink liquid
Density @ 16 C.............................1.02 kg/liter
pH..........................................................8 - 9
Soluble in Water.................................100%

SAFETY AND HANDLING:

Before handling, storing, or product use, see the Material Safety Data Sheet (MSDS) for details.

DISTRIBUTION:

VPR-X is available in 20 Liter Pails and 1250 liter Totes.
